

Abhay Raj Chauhan

+91 63860 88195 abhayrajchauhan.976@gmail.com GitHub LinkedIn

Skills Summary

Languages: JavaScript, Java, C/C++

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Framer Motion, GSAP

Database: MongoDB (Mongoose), MySQL

Tools: Git, GitHub, VS Code, Figma, Postman

Cloud/DevOps: AWS (S3, EC2, IAM, VPC), Vercel, Render

Backend: Node.js, Express.js, REST APIs, JWT, Zod, bcrypt

AI Integration: Google Gemini API, OpenAI API

Concepts: OOP, DSA, MVC, SDLC, Agile, Scrum

Experience

Web Development Intern

06/2025 – 07/2025

Proxenix, Remote

- Built **responsive UI with React, HTML/CSS** and integrated backend APIs for functional client dashboards.
- Implemented **reusable components and JWT-based authentication** using Git, GitHub, and agile workflows.
- Delivered real-world web deployment with client feedback cycles in an **MSME-certified remote program**.

Projects

Trippy – AI-Powered Travel Planner

[GitHub] [Live]

React.js, Node.js, Express.js, MongoDB, Gemini API, JWT, Tailwind CSS

- Built a **full-stack AI-powered travel planning platform** using React.js, Node.js, Express.js and MongoDB, implementing **JWT authentication**, protected REST APIs and a scalable backend architecture.
- Integrated **Google Gemini API** to generate personalized day-by-day travel itineraries based on destination, budget, duration and user preferences, **reducing manual trip planning effort by 80%+**.
- Developed **20+ REST API endpoints** and **15+ reusable React components**, improving code reusability, maintainability and accelerating feature development.
- Strengthened application security with **JWT, bcrypt password hashing, Zod validation** and centralized middleware, ensuring secure authentication and robust request validation.
- Optimized frontend performance through **lazy loading** and reusable components, **reducing initial page load time by 35%**, while delivering a responsive UI with **Tailwind CSS, Framer Motion and GSAP**; deployed on **Vercel and Render**.

CloudSphere – Cloud Storage Platform

[GitHub]

Node.js, Express.js, MongoDB, AWS S3, EC2, IAM

- Developed a **cloud-based file storage platform** using Node.js, Express.js, MongoDB and **AWS S3**, enabling secure file upload, download, sharing and access management through REST APIs.
- Integrated **AWS S3** with role-based access control and secure file handling, implementing **automated file lifecycle management** and on-the-fly file conversion to optimize cloud storage workflows.
- Designed and optimized **15+ REST API endpoints**, improving backend scalability and **reducing API response time by 25%** through efficient database queries and asynchronous processing.
- Configured AWS infrastructure including **EC2, IAM, VPC, Security Groups and Load Balancer**, gaining hands-on experience in deploying secure and scalable cloud applications.
- Validated the platform with **200+ file operations** while maintaining **100% successful** upload/share reliability, following modular architecture and best practices for maintainability and scalability.

Education

Jaypee University of Engineering and Technology

Aug 2022 – Jun 2026

B.Tech in Computer Science Engineering

Certifications

- Mastering ReactJS – Infosys
- AWS Certified Cloud Practitioner – Infosys
- Software Engineering and Agile software development – Infosys
- Agile and Scrum Fundamentals – Infosys

Achievements

- Developed and deployed **AI-powered and cloud-based full-stack applications** using the **MERN stack and AWS**.
- Completed an **industry internship** focused on **React.js development, REST API integration**, and secure authentication.
- Certified in **AWS Cloud Practitioner, React.js, Agile, and Software Engineering** through Infosys Springboard.
